

STM32U5 Azure Quick Connect

Hardware Requirements

- [B-U585I-IOT02A Discovery Kit](#)
- Micro-USB Cable

Create an Azure IoT Central Application

Click the [Quick Connect Application Template](#) and login with a valid Microsoft account (no subscription required)

After choosing a unique Application name, URL, and Pricing plan click 'Create'

The screenshot shows the 'About your app' page in the Azure IoT Central console. The left sidebar contains navigation links: Home, Build, and My apps. The main content area is titled 'STM32' and includes a sub-header 'About your app'. Below this, there are three input fields: 'Application name' (containing 'STM32AzureQuickConnect'), 'URL' (containing 'stm32azurequickconnect'), and 'Pricing plan'. The 'Pricing plan' section has four radio button options: 'Free' (selected), 'Standard 0', 'Standard 1', and 'Standard 2 (most popular)'. Each option has a description and a list of features. At the bottom, there is a 'Create' button and a 'Cancel' button. A disclaimer at the bottom states: 'By clicking "Create" you agree to the [Subscription Agreement](#) and [Privacy Statement](#). Provisions in the agreement with respect to pricing, cancellation fees, payment, and data retention do not apply to "Free". "Standard" plans require an Azure subscription, and you acknowledge that this service is licensed to you under the terms applicable to your [Azure Subscription](#).'

Azure IoT Central

STM32

Seamlessly connect your STM32 device to this IoT Central Application in minutes.

Create Cancel

Add A Device Your Central Application

In the menu on the left select 'Devices'

Select 'New' to add a new device

Enter a unique 'Device name' and 'Device ID'
Choose 'B-U585I-IOT02A IoT Node 2 discovery kit.' as the Device Template.
Make sure 'Simulate this device' is not selected
And select 'Create'

Create a new device

To create a new device, select a device template, a name, and a unique ID. [Learn more](#)

Simulate this device?

A simulated device generates telemetry that enables you to test the behavior of your application before you connect a real device.

☐ No

Create

Cancel

Your new device should now populate in the devices tab
